

Amendments to the Claims

See revised Listing of Claims, following this section.

Claim 1 Change claim 1, page 10, lines 11-12, from "... a signal transmitting means operatively connected to said at least one motion sensor ..." to "a signal transmitting means operatively connected to said at least one motion detector ...", to match language used in claim 1, line 2, "at least one motion detector", for clarification. See also specification, page 3, lines 17-22, referring to the device as a "motion detector."

Claim 7 Change claim 7, page 10, line 29 from "The device of claim 5..." to "The device of claim 1..." since this claim's ultrasonic beam is not a variety of claim 5's "light beam motion detector," but of claim 1's "motion detector."

Claim 9 Change claim 9, page 11, line 9, from "... comprises a siren sound, ..." to "... comprises at least one of a siren sound, ...", and from "... a shriek, yell, shout, scresm ..." to "... a shriek, yell, shout, scream ...", for clarification and to correct a typographic error. See page 6, lines 7-11.

Claim 10 Change claim 10 from "... said power source comprises battery, ..." to "... said power source comprises at least one of a battery, ...", for clarification. See page 8, lines 23-27.

Claim 15 Change claim 15, page 12, lines 1-2, from "...comprises at least on

face, head or body of a: dog, ..." to " comprises at least one of a face, head and body of at least one of a dog, ...", for clarification and to correct a typographic error. See page 6, line 24-page 7, line 1.

Claim 20 Change claim 20, page 12, line 19, from "The device of claim 19..." to "The device of claim 16 ...", since claim 20's integral "movable portion" is consistent with claim 16's general movable portion, but not with claim 19's "detachably connected" movable portion.

Claim 23 Change claim 23, page 12, line 28, from "Teflon" to "TEFLON ®" to acknowledge that Teflon is a registered trademark of E.I . Dupont De Nemours.

Claim 25 Change claim 25, page 13, lines 5-6, from " ... comprises ultraviolet, ..." to "comprises at least one of ultraviolet, ...", for clarification. See page 7, lines 16-20.

Claim 29 Change claim 29, page 13, lines 19-20, from " ... transmitting means comprises hard wiring, a fiber-optic connection or wireless transmission ..." to "...transmitting means comprises at least one of hard wiring, a fiber-optic connection and wireless transmission ...", for clarification. See page 7, lines 4-6.

Claim 30 Change claim 30, page 13, line 23 from "... same animal as said depiction ..." to "... same animal as said warning replica," to cure antecedent basis problem. See Remarks section.

Claim 31 Change claim 31, page 13, line 26 from "... an animal different from said depiction ..." to "... an animal different from said warning replica," to cure antecedent basis problem. See Remarks section.

Claim 32 Change claim 32 from " ... presence of a dog comprising a watch

Application No. 10/672,813
Amendment Date: December 27, 2006
Reply to Office Action dated July 28, 2006

dog, German Shepard, Doberman, and Rottwieler.” to “ ... presence of a dog comprising at least one of a watch dog, German Shepherd, Doberman and Rottweiler.”, for clarification and to correct misspellings.

Application No. 10/672,813
Amendment Date: December 27, 2006
Reply to Office Action dated July 28, 2006

Revised Listing of the Claims:

This listing will replace all prior versions and listings of claims in the application:

What is claimed is

1. (Currently amended) An alerting device, comprising:
 - at least one motion detector;
 - an announcement device with a prerecorded message;
 - at least one light emitting device;
 - at least one warning replica
 - at least one warning sign;
 - at least one illumination means,
 - a signal transmitting means operatively connecting said at least one motion ~~senser~~ detector to said announcement device, to said at least one warning replica, to said at least one warning sign, to said illumination means; and
 - a power source for supplying energy to said alerting device.
2. (Original) The device of claim 1, further comprising a manual on and off switch, said switch operatively connected to said alerting device.
3. (Original) The device of claim 1, wherein said at least one motion detector further comprises a timer.
4. (Original) The device of claim 1, wherein said alerting device is portable.

5. (Original) The device of claim 1, wherein said at least one motion detector is a light beam motion detector.
6. (Original) The device of claim 5, wherein said light beam motion detector is an infrared detector.
7. (Currently amended) The device of claim ~~[[5]]~~ 1, wherein said at least one motion detector is an ultrasonic beam motion detector.
8. (Original) The device of claim 1, wherein said at least one motion detector generates a signal that enables said announcement device to play said prerecorded message and said at least one light emitting device to illuminate said at least one warning replica and said at least one warning sign.
9. (Currently amended) The device of claim 1, wherein said prerecorded message comprises at least one of a siren sound, a buzzing sound, a bell, a horn, a gun shot, a shriek, yell, shout, ~~scream~~ scream, musical notes, an animal sound, a dog growl, words of warning, specific announcement, and a dog bark.
10. (Currently amended) The device of claim 1, wherein said power source comprises at least one of a battery, solar power and household current.
11. (Original) The device of claim 1, wherein said motion detector is adjustable to illuminate the at least one warning replica under varying lighting conditions.

- 12 (Original) The device of claim 1, wherein said at least one warning replica is positioned in the space defined by said at least one warning sign.
- 13 (Original) The device of claim 1, wherein said at least one warning replica is positioned in the space beyond the space defined by said at least one warning sign.
- 14 (Original) The device of claim 1, wherein said at least one warning replica comprises at least one of: animal face, animal profile, animal head, a partial animal body, a complete animal body, an animal or human skull, bones, skeleton, police car, flashing lights of a police car and any attention drawing subject.
- 15 (Currently amended) The device of claim 14, wherein said animal face or animal body comprises at least ~~on~~ one of a face, head or and body of a ~~at~~ least one of a dog, wolf, tiger, lion, leopard, cheetah, hyena and other vicious animal.
- 16 (Original) The device of claim 14, wherein said animal face, animal profile, animal head, animal body further comprise a movable portion, said movable portion being capable of changing its position contemporaneously or sequentially with said prerecorded message.
- 17 (Original) The device of claim 16, wherein said movable portion further comprises ears and jaw of an animal, said jaw being capable of opening and closing movements.

- 18 (Original) The device of claim 17, wherein said jaw further comprises at least one tooth and a tongue.
- 19 (Original) The device of claim 16, wherein said movable portion is detachably connected to said at least one warning replica.
- 20 (Currently amended) The device of claim ~~[[19]]~~ 16, wherein said movable portion is an integral part of said at least one warning replica.
- 21 (Original) The device of claim 1, wherein said at least one warning replica is made of weather resistant material.
- 22 (Original) The device of claim 21, wherein said weather resistant material is high density molded plastic.
- 23 (Currently Amended) The device of claim 22, wherein said high density plastic is ~~Teflon~~ TEFLON®.
- 24 (Original) The device of claim 1, wherein said at least one light emitting device is positioned in the interior of said at least one warning replica.
- 25 (Currently amended) The device of claim 24, wherein said at least one light emitting device comprises at least one of ultraviolet, blue, yellow, orange, green and red colors.
- 26 (Original) The device of claim 1, wherein said at least one light emitting device is capable of intermittent operation.

Application No. 10/672,813
Amendment Date: December 27, 2006
Reply to Office Action dated July 28, 2006

- 27 (Original) The device of claim 1 wherein said at least one motion detector, said announcement device, said warning replica and said at least one light emitting device are an integral unit.
- 28 (Original) The device of claim 1 wherein said at least one motion detector, said announcement device, said warning replica and said at least one light emitting device are not an integral unit.
- 29 (Currently amended) The device of claim 1 wherein said transmitting means comprises at least one of hard wiring, a fiber-optic connection ~~or~~ and wireless transmission.
- 30 (Currently Amended) The device of claim 1 wherein said warning sign warns of the presence of the same animal as said ~~depiction~~ warning replica.
- 31 (Currently Amended) The device of claim 1, wherein said at least one warning sign warns of the presence of an animal different from said ~~depiction~~ warning replica.
- 32 (Currently amended) The device of claim 1 wherein said at least one warning sign warns of the presence of a dog comprising at least one of a watch dog, German ~~Shepard~~ Shepherd, Doberman and ~~Rottweiler~~ Rottweiler.
